In today's business world, mobility is enabling consumers and workers to become more productive, connect with others, and easily access, edit, print, and share documents.

- The top three benefits of implementing mobile print and scan solutions are: customer satisfaction, employee satisfaction, and transformation of the office to the workplace of the future.

*Source: IDC PlanScape: Mobile Print and Scan Vision, doc #US41990917, September 2017*

In a 2017 analysis of mobile print and scanning solution providers performed by KeyPoint Intelligence, results indicated that "Canon is one of the strongest scoring vendors thanks to a strong market approach and a diverse portfolio in free and enterprise categories."

## BYOD—NEW TERMINOLOGY FOR THE NEW WAVE IN BUSINESS

Bringing Your Own Device to the office has become prevalent in today's business environment. Increasing digital content has made enterprise and even small-business workers ever more reliant on mobile solutions that enable them to connect, communicate, collaborate, and print documents any place and at any time.

Your employees may have smartphones and tablets that they need to integrate into your company's workflow. They may need to connect while out of the office, on the go, or from remote virtual offices. How do you know which mobile technology can help provide your business with secure distribution of sensitive information?

Canon Solutions America has a diverse portfolio of mobile solutions to fit just about every business environment. We can help you determine which solution is right for your business and help turn a complex decision into an easy choice.

## MOBILE PRINTING

Canon Solutions America offers a selection of mobile printing solutions that provide the ability to print directly from mobile devices, with the touch of one button and without being required to log on to a desktop PC or laptop.

Mobile printing solutions today have varying levels of functionality. Canon's mobile printing product portfolio includes four solutions, all of which are simple to use, intuitive, easy to implement, and competitively priced.

### CANON PRINT BUSINESS

The intuitive and streamlined user interface combines the ability to print, capture, and save data to local multifunction devices (MFDs). In addition to providing mobile print, the app provides users with a full breadth of finishing features making it an excellent choice for both home and business.

### CANON DIRECT PRINT & SCAN FOR MOBILE (DPSM)

DPSM comprises a MEAP application and a mobile client application that resides on an iPhone®, iPad®, Android™ tablet/phone, or BlackBerry® smartphone. This pairing provides users with a driver-less, server-less mobile print and scan solution which easily integrates with the Canon imageRUNNER ADVANCE platform and certain imageRUNNER MFDs.

### EFI PRINTME

EFI PrintMe™ is a mobile print solution for Canon imageRUNNER ADVANCE office products. It's an ideal solution for organizations that have remote workforces and "road warriors" as well as the need to provide access to print for guests and contractors.

### UNIFLOW MOBILE PRINTING

uniFLOW Mobile Printing is the right solution for organizations that have strict security requirements and the need to monitor and report on both device and user activity. uniFLOW Mobile Printing is an on-premise server-based solution that offers four different methods of mobile printing (email, cloud, direct, and AirPrint) with statistics and reporting functionality.

## MOBILE SCANNING

### CANON PRINT BUSINESS

Capture and save data in multiple formats and upload and download data to and from popular cloud repositories such as DropBox™ and Google Drive. For iOS users, you can extract text from data to create text-searchable PDFs via Readiris for iPad app.

### CANON DIRECT PRINT & SCAN FOR MOBILE

Similar to the scanning functionality of Canon PRINT Business, this peer-to-peer solution can save data scanned by Canon multifunction devices into iPads, iPhones, Android tablets and phones, or Blackberry smartphones.

## MOBILE DOCUMENT MANAGEMENT

Today's enterprise organizations and even some small to medium sized businesses are optimizing their business processes with robust document management solutions which foster document capture, processing, collaboration, and archiving – completing the document lifecycle. Therefore's premier document management solution includes mobility as a core application.

### THEREFORE

The Therefore Mobile App allows users to access the Therefore system on their mobile device. This mobile app enables users to search and view the latest version of documents saved to Therefore, and even export documents to an associated app on their mobile device. Users can also edit index data, as well as participate in workflows via the mobile app. The Therefore Mobile App is compatible with iPhone, iPad, or Android, and is available for download from the App Store<sup>sm</sup> or Google Play.<sup>tm</sup>

## GOING MOBILE WITH CONFIDENCE

Freedom of access doesn't have to mean reduced security. Secure mobile solutions give your employees the freedom to communicate easily and securely to any location or device on your network. Our mobile solutions incorporate user authentication via proximity cards, PIN codes, or user names and passwords for server access or for secure print release. Our solutions can help to keep your confidential information safe from prying eyes.

## UTILIZE MOBILE TECHNOLOGY TO ITS FULL POTENTIAL WITH PROFESSIONAL SERVICES FROM CANON SOLUTIONS AMERICA

Whether your business is large or small, remaining competitive in the global economy means you need to concentrate on what makes you successful—your core business. When selecting and implementing new technology, a highly skilled technical team makes the difference for a successful deployment.

Canon Solutions America has the team of experts you need to help you acquire the right technology, solutions, and services for your organization. From pre-sales analysis to post-sales support, our team of technical professionals draws upon decades of technical expertise and real-world experience to ensure you obtain the maximum benefit from your technology investment.
