

FOCUS ON THE CLASSROOM, NOT PRINTING

Eliminating the Need for Print Servers in K-12

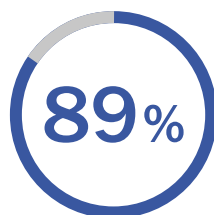

- Elimination of Print Servers
- Centralized Print Management
- Secure Support for Chromebook and iPad® mobile devices

- Self-Service Printer Installation
- Simplified VDI/Remote Session Printing
- Print Job Auditing and SNMP Alert Monitoring
- Mobile and Staff Printing

Reduction in Printer Management

95 percent of PrinterLogic K-12 customers say they spend far less time managing printers

Reduction in Help Desk Calls

89 percent reported a substantial reduction in help desk calls

PRODUCT OVERVIEW

PrinterLogic's Education solution helps K-12 school districts reduce costs, printer downtime, and help desk calls. Reduce the support burden on IT and administration resources by eliminating print servers, moving to centralized printer management, employing self-service printer installation, and facilitating Chromebook printing to existing printers.

Teachers and staff will be empowered to solve basic printer problems themselves, leading to an increase in productivity and the ability to focus more on important core initiatives.

Centralized Printer and Driver Management

- Effortlessly import and migrate all printers into the PrinterLogic Admin Console
- Centrally manage end-user printers, drivers, device settings, and preferences
- Automatically apply all changes made by the administrator to end-user printers
- Eliminate complicated scripting and GPOs
- Deploy printers based on AD user, group, OU or IP address range
- Role-based access control for the help desk IT workers

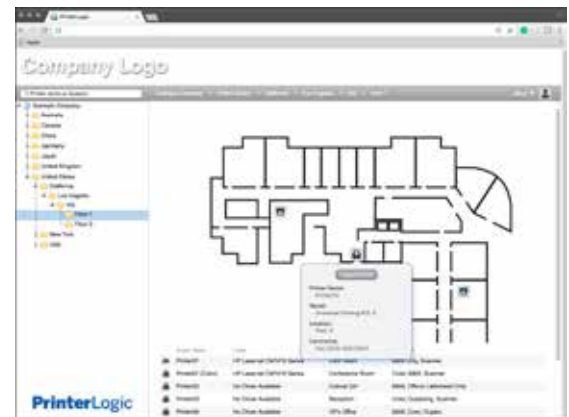

Admin Console

Secure Pull Printing

- Helps to ensure documents are not released until the user is at the printer to pick them up
- Release print jobs to any printer authorized to receive pull-print jobs
- Utilize badge scan, release station, or mobile device to release print jobs

Self-service Printer Installation Portal

- Empower end-users to self-install printers with a single click
- Provide optional floor plan maps to help end-users locate and install printers
- Helps to reduce the number of help desk calls

Staff Self-Service Portal

Simplified VDI/Remote Session Printing

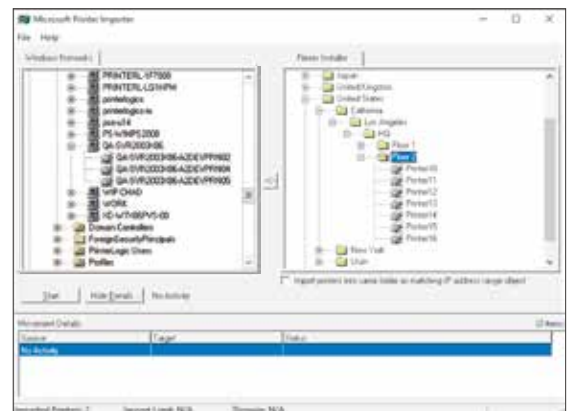

- Auto-deploy printers in session, based on IP address of endpoint device
- Instantly create printers in the session and speed up login times
- Leverage VDI compression for print jobs across the WAN

Print Job Auditing and SNMP Alert Monitoring

- Generate reports to proactively control costs and manage resources
- Track and audit print jobs by user, department, job title, or printer
- Tie actual cost of printing to usage data
- Monitor physical printer statuses through SNMP
- Share print usage and costs with department managers

Mobile and Staff Printing

- Print natively from Android™, iOS®, and Chromebook
- On- or off-network direct email to print functionality
- Works with available printers; no additional printers needed
- No software to install on device
