

HELP ACHIEVE SECURE PAPERLESS INFORMATION EXCHANGE WITH CLOUD MESSAGING

SMART CHANGE STARTS HERE.

FAX2MAIL IS A FAX SERVICE THAT CAN ELIMINATE EXCESS FAX HARDWARE, ENHANCE EMPLOYEE PRODUCTIVITY, DRIVE PROFITABILITY, AND ACCELERATE CYCLE TIMES.

While faxing may be an integral part of your business processes, fax machines, paper, backend infrastructure, and supporting IT resources continue to be a costly part of many business operations. Moreover, your employees' productivity can take a hit due to the manual handling of documents associated with traditional faxing. Failure to address these challenges could slow down critical processes, and impact your organization's bottom line and overall performance.

No additional hardware or software required

Fax2Mail is a cloud-based, cost-effective document delivery solution that works with your current infrastructure. You can send and receive faxes as electronic messages directly from your email account. There are no hidden costs for maintenance, upgrades, capacity expansion or redundancy.

Help reduce operating expenses and cycle times with the unlimited scalability of Fax2Mail

Fax2Mail's cloud basis offers more capacity and infrastructure than most organizations can comfortably purchase in-house, with a proprietary network consisting of tens of thousands of fax ports that scale to support large data transmissions and peak periods.

Send, receive, store and print time-sensitive documents from your desktop – electronically

Fax2Mail gives you the ability to capture all of your faxes via email in the form of an attachment, so only the intended recipient sees the fax. Additionally, faxes can be received 24/7, even on laptops and mobile devices, whether you are in the office or traveling. That prevents sensitive information from sitting on the fax machine for hours or days.

The industry's most sophisticated security

Fax2Mail uses industry standard encryption for sent and received faxes. Redundant systems and components are in place for security and back-up service delivery.

Full disaster recovery

Fax2Mail is supported by a highly evolved network of multiple, redundant, geographically diverse data centers that provide service availability 365 days per year.

BENEFITS

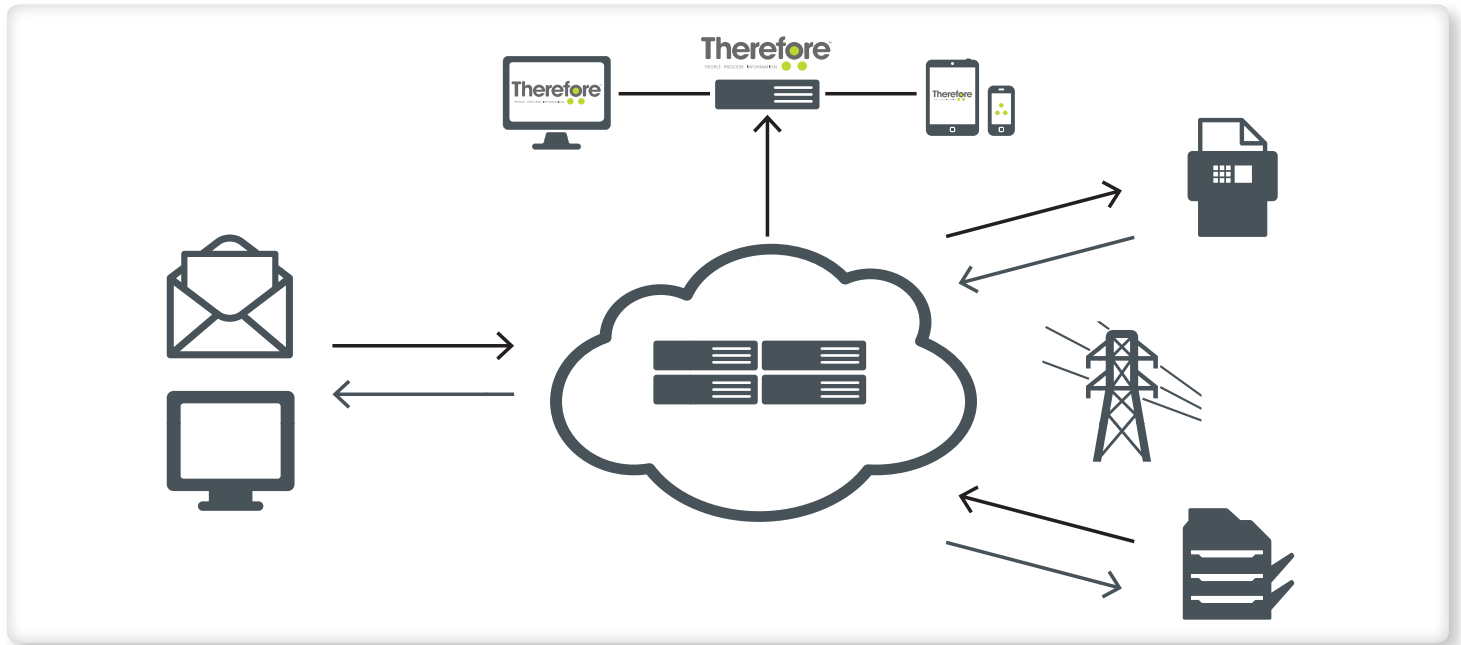

- Send and receive faxes as electronic messages
- Reduce costs by eliminating fax machines, fax servers and telephony infrastructure
- Transmit faxes with the elevated security
- Help avoid service disruptions
- Ease the administrative burden
- Fax at volumes that meet your business needs

Web-based administration tool for real-time account modifications

Personally control your Fax2Mail account through a secure web interface that provides centralized administration, reporting, user management, cover sheet management, billing attributes as well as delivery report options.

Network accessibility and state of the art architecture

High availability – massive network delivering over five million faxes daily on the Fax2Mail platform for many of the largest enterprises in the world.

PRICE COMPARISON; 1,500 PAGES - 5 FAX MACHINES/LINES

Average 5 Pages per Fax, 300 Fax Messages
